

HoneyOS

Screen Design Catalog

Mobile PWA | Reference design and major screens

Audience	HoneyOS for independent and small-scale beekeepers
Included	10 visual sets selected from 31 primary screens
Use	UI implementation, review and flow confirmation

See HoneyOS UI Implementation Spec for interaction and state details

CORE SET 01

Home, Colony List and Colony Detail

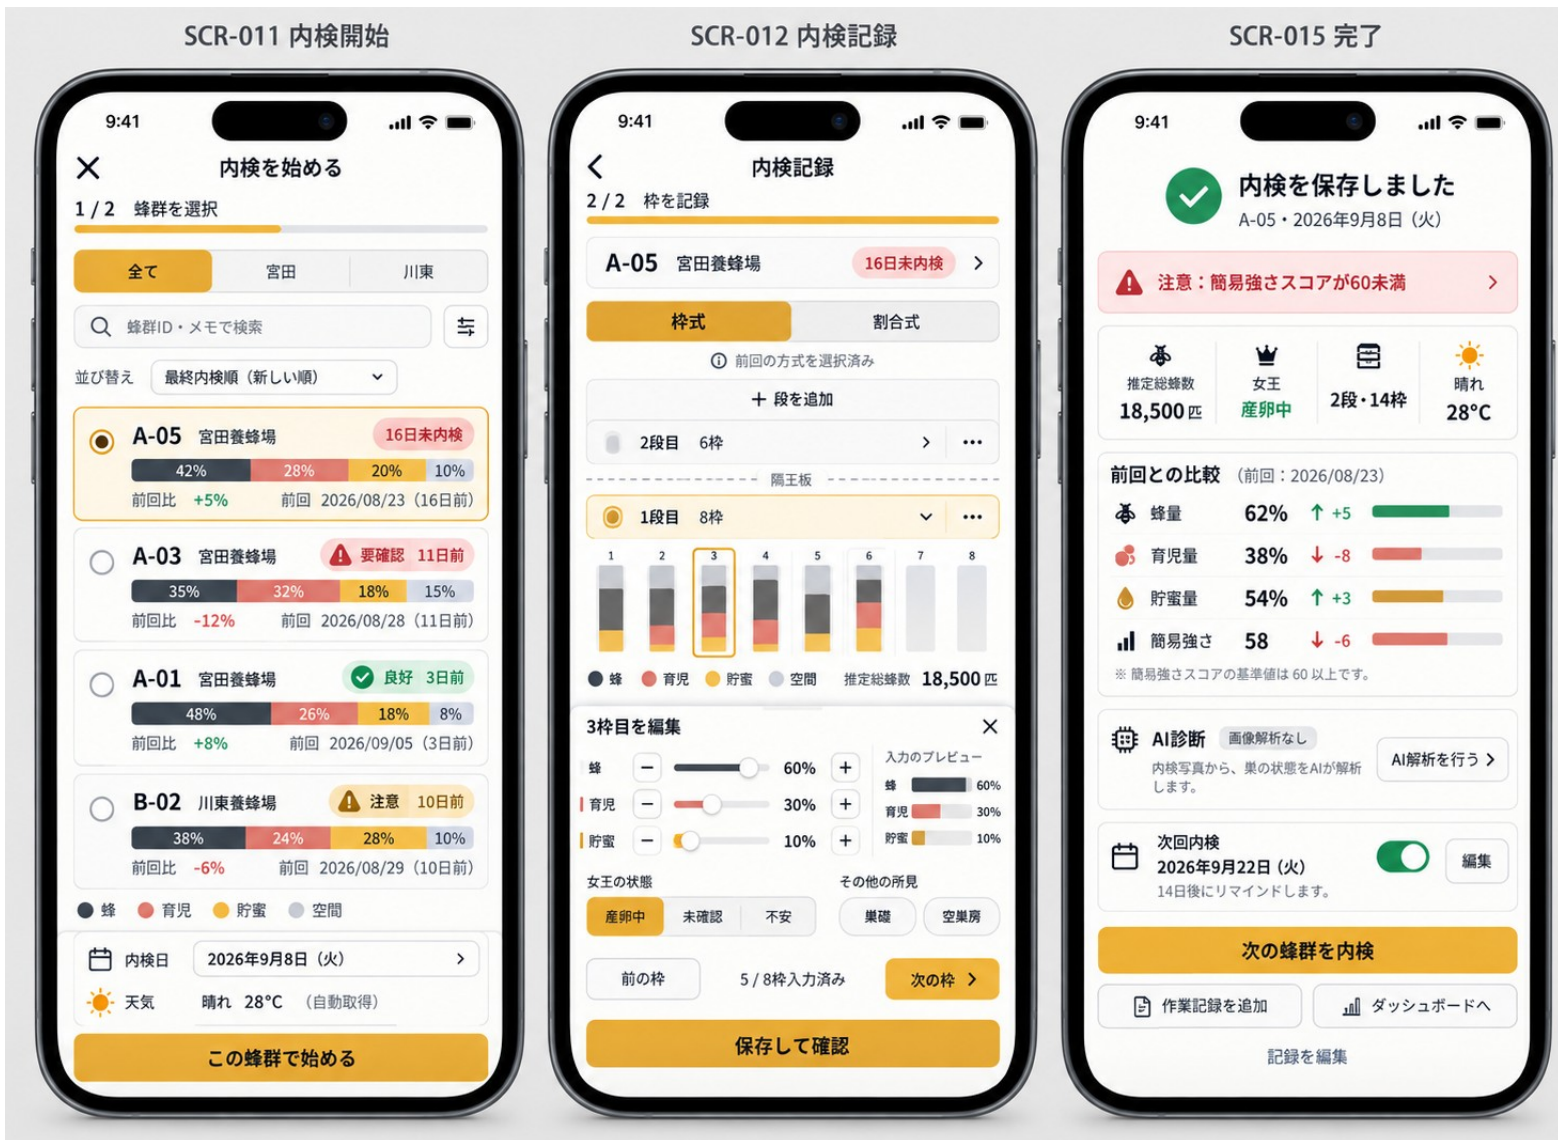

Core daily workflow: overview, comparison and colony-level review.

CORE SET 02

Inspection Start, Record and Complete

Focused inspection workflow from colony selection through follow-up.

CORE SET 03

Work, Reports and Settings

Tasks, monthly decisions and operating settings across the five-tab app.

DETAIL SET 01

Frame Viewer, Sensors and Temperature

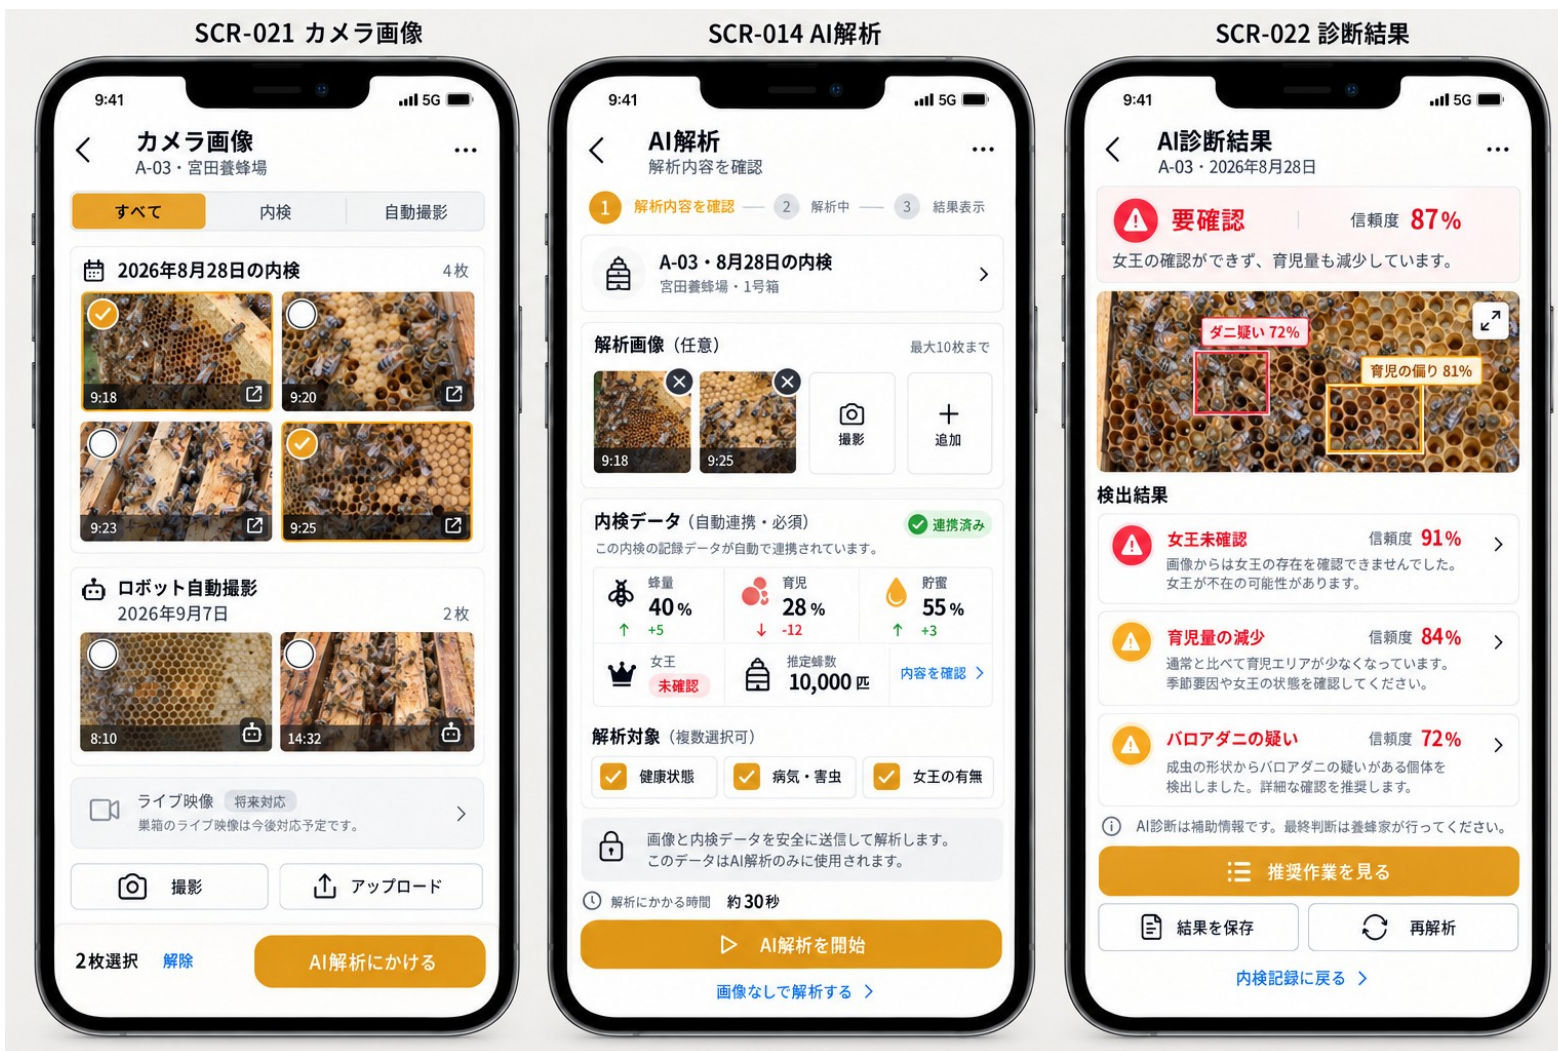

Hive structure, sensor overview and anomaly-period review.

DETAIL SET 02

Camera, AI Analysis and Diagnosis

Inspection images and AI guidance with uncertainty made explicit.

DETAIL SET 03

AI Actions, Task Creation and Work Log

Turns insight into scheduled tasks or completed work records.

OPERATIONS 01

Notifications, Apiary Map and Work History

Alerts, onsite navigation and retrieval of completed work.

ANALYSIS & SETUP 01

Colony Trends, Comparison and Add Colony

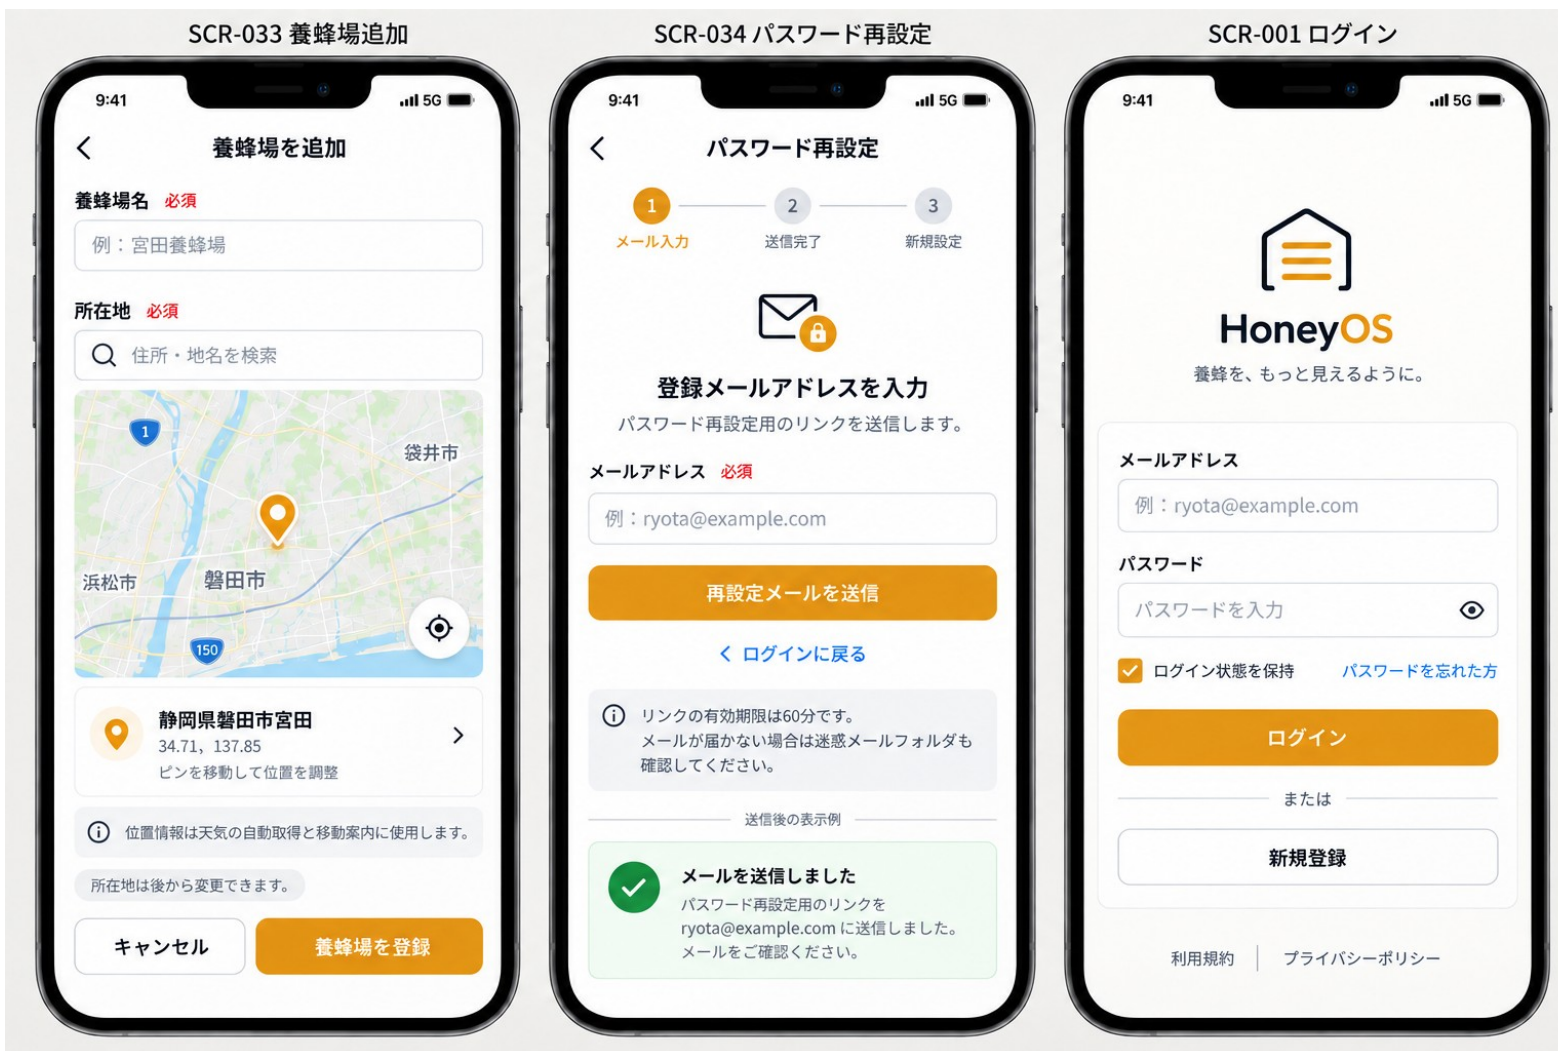

Time-series comparison, side-by-side review and pre-inspection registration.

ACCESS & SETUP 01

Add Apiary, Password Reset and Sign In

Location setup and secure access with minimal input.

ONBOARDING

Sign Up, Welcome, Setup and Ready

Optional-first setup that reaches the first inspection quickly.
